The Smart Roller Blind

## Introducing SonaRise, our Intelligent Motorised Roller Blind

Combining style, functionality and technology, meet SonaRise our intelligent roller blind. Our roller blinds are all hand finished by experts in our very own UK factory using tried and tested manufacturing methods, along with our commitment to using only the best materials. Additionally, our blinds offer exceptional automated functionality, including light control, thermal efficiency and effortless maintenance. Whether you require blackout or dimout opacity, our blinds are the ultimate solution in any commercial or residential setting.

### Made in the UK

At SONA all of our products are made to measure in-house by our talented production specialists. We take a great deal of pride in delivering quality made products for each of our customers, ensuring you have a hassle-free experience every time.

### 3-year warranty

We are so confident in the first-class workmanship, high quality componentry and durable fabrics we use that we offer a 3-year warranty across our entire range, giving you the peace of mind that our products are here to last.

### Support

We have technical advice and support on hand to suit you, ranging from installation guidance, on-site training and general troubleshooting. We've taken the time to get to know our products so rest assured we've got you covered.

# Leverage the Power of Automation

All of our products feature the leading blind technology, enabling you to individually or group control your blinds via a Handset, Wall Switch or Smart Device in conjunction with a Smart Hub. Our blinds can be linked to Home Automation equipment or a Building Management System. Automation provides the ultimate convenience, whilst offering child safety, energy savings and hassle-free privacy benefits. We also manufacture our blinds with an inbuilt soft-close operation system ensuring our blinds work seamlessly every time.

## FEATURES

### Bespoke Sizes Available

Our standard roller blinds are available up to 3m wide, however we can manufacture blinds in a variety of bespoke shapes and sizes to suit your requirements.

### Power Options

We offer a Mains, Re-chargeable Battery or Solar Power options giving you the flexibility to install your blinds to your chosen specification.

### Hassle Free Installation

On-site training, telephone support and instruction guidance also ensure you have a hassle-free experience dealing with our products.

## BENEFITS

### Superior Convenience

Our innovative roller blinds are easy to install, maintain and clean. The unique design of our blinds can help control light, heat and maintain privacy. Available in a choice of aluminium open cassettes and a wide range of fabrics, our blinds give you the flexibility in any space.

### Noise Reduction

The unique acoustic properties of our fabric help to reduce the impact of external noise, minimising the level of sound coming through a window whilst absorbing any ambient sound to create a more comfortable atmosphere.

### Easy Cordless Operation

Our blinds have no pull cords or attachment bars and operate easily with the touch of a button from a Handset or Smart Device. They are especially useful when covering hard to reach windows and provide additional safety in homes with young children.

## Simple Integration, Complete Control

Integrating our intelligent blind to your Home Automation or Building Management System couldn't be simpler. Our blinds can be operated together with audio-visual, lighting and security mood and scene settings. Common integrations include, Control4, Lutron, Crestron, Google Home and Amazon Alexa.

However, our blinds can usually be operated by most third-party control systems. More complex installations will need additional components to enable the blinds and the specified system to 'talk' to one another. Operation via one of the stand-alone handsets is also possible.

### APPLICATIONS

#### Smart Devices

Our blinds with the addition of a Smart hub can connect to Smart Devices such as Google Home, Amazon Alexa or Apple HomePod, giving full operational control from your smartphone, tablet or voice command.

#### Home Automation Systems

All of our blinds can be integrated into the leading Home Automation Systems on the market today, allowing you to operate your blinds straight from a tablet, smartphone or a computer anywhere and anytime.

#### Building Management Systems

Automated shading and window blind control is a key part of an intelligent building today. Our blinds can be linked to a Building Management System, giving you full control and flexibility in managing the blinds in a commercial environment.

## HANDSET OPTIONS

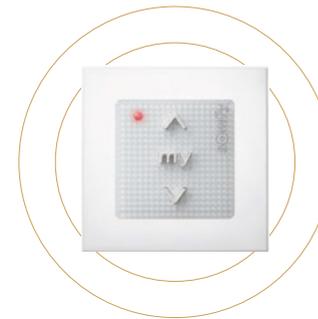

### Single-Channel Handset

The Single-Channel Handset allows you to control 1 motorised blind or 1 group of motorised blinds (max of 8 blinds) using the up, down and stop functions. The 'my' function memorises your favourite position. Available in white.

### Multi-Channel Handset

The Multi-Channel Handset allows you to control 4 motorised blinds or 5 groups of motorised blinds (max of 40 blinds) using the up, down and stop functions. The 'my' function memorises your favourite position. Available in white.

### Wall Switch

The Smoove RTS Wall Switch is available in a 1 or 4-channel version allowing you to use the up, down and stop functions. The 'my' function memorises your favourite position. Available in white.

# Powered by Innovation

SonaRise works with a range of wire-free battery and mains powered motors from Somfy.

## Roll Up 28 RTS

The Roll Up 28 RTS uses reliable lithium-ion technology for the ultimate performance. This motor is suitable for smaller to medium sized blinds with a max blind size of 8m<sup>2</sup>. Raise or lower your blinds in comfort with effortless control.

## Sonesse ULTRA 30 RTS

Powering larger roller blinds up to 9m<sup>2</sup>, this battery powered motor is suitable for larger sized blinds. With a quick and easy setup process and an ultra-quiet drive motor, the Sonesse Ultra 30 RTS enables blinds to be raised and lowered with smooth, quiet motion.

## Sonesse 40 RTS

Suitable for a wide range of blind sizes, the Sonesse 40 RTS derives its energy from a mains power supply. Convenient and reliable with no charging required, blinds can be raised or lowered with a simple touch of a button.

## Solar Pack

The energy efficient solar pack utilises the motors inbuilt Li-ION battery technology, this patented energy saving technology uses sunlight to power the motorised blinds.

## Colours & Fabrics

We believe creating the perfect bespoke roller blind begins with fabric. From durable commercial grade fabrics to softer more luxurious sheers, we have a versatile range of colours and materials to suit your specification.

### Blackout

Our Blackout fabric is specially designed to shield light entering into the room providing better privacy, reduced noise and sun protection.

### Dimout

Our Dimout fabric provides privacy whilst still providing an excellent way to diffuse the light entering a space whilst not making the area totally dark.
